

## INDOTA CM13 CHARGING CART

The **Indota CM13** 36 Bay Trolley is a safe and secure mobile trolley that offers storage and charging for Laptops, Chrome-books or tablets such as iPads.

Each bay has its own dedicated power socket and with Indota's SMART charging system you can efficiently charge your devices, prolonging the battery life. Also with SMART comes the ability to choose when your devices charge on the programmable timer so if you have cheaper energy at night you can set it to charge then. Throughout, the trolley has built in Ventilation to ensure your devices are kept cool.

Many schools throughout Australia now use iPads and Tablets in the classroom, all these devices need to be kept secure and charged each night after use. An iPad/Tablet charging cart can be a great solution to this issue by keeping them charged, mobile, secure and accessible.

You may wish to synchronise your iPads with the latest software, apps or create backups. This can be achieved by the 'Plus' cart, such as the CM13 Plus which can fit 36 devices at once, ensuring that your devices are charged, synchronised and ready for the day ahead.

**36 Individual Bays with Cable management**

**SMART Charging System**

The **Indota CM13** is available in two different variations: **Indota CM13** and **Indota CM13 Plus**.

### **Indota CM13—36 Devices—Charge Only**

The **Indota CM13** is a **'Charge Only'** that will accommodate most makes and models of devices including laptops, Chromebooks and iPads.

Devices are charged using their own AC adapters that are housed in the rear of the cart, the adapter wires lead into the front of the cart where the devices are kept. The Indota Cart includes an efficient cable management system that eliminates the “octopus” effect. Individual slots for power adapters with wide space between outlets to accommodate most plug adapters will keep cables clean and organized.

Optional slide-out shelves make placing and pulling devices easy, comfortable and safe. Eliminating the need to reach in, or pull devices out, the slide-out shelves also reduce potential damage.

### **Indota CM13 Plus—36 Devices—Syncing Version**

The **Indota CM13 Plus** version is a **'Charge and Sync'** cart, made possible thanks to the smart SyncBox in the rear of the unit ready for you to plug in your own USB cables for your chosen devices, giving you ultimate flexibility with what to use. With no programming required, the Indota CM13 Cart ensures safe and efficient charging for all devices saving time and money.

The Indota CM13 Plus will charge any 'USB Chargeable' device. It will not accommodate devices needing an AC adapter.

## INDOTA CM13 CHARGING TROLLEY
