

5000 Series Wireless Microphone

The new 5000 series systems are designed with the price conscious customer in mind yet all the while they offer reliable and clean performance.

With a user selectable frequency set of 16 UHF channels and antenna diversity operation the 5000 series is an excellent choice for stage performers, demonstrators and instructors, paging and many more. The simple menu driven software allows users to monitor transmitter battery status, program user names and more.

Features Include:

- 16 channel programmable UHF frequencies
- LCD menu driven display
- Low level battery indicator for transmitter on receiver front panel
- Antenna diversity operation

A choice of optional identifying colour tips are available.
